dcorredorvallejo@worldbank.org

Research assistant at the Development Impact Evaluation (DIME) department of the World Bank. Interested in issues related to development economics, labor economics, social protection, education, and applied microeconomics.

Education

- 2022 **Master's Degree in Economics (coursework completed in 2022, thesis completed in 2024).** ([Thesis here](#)), *Universidad de los Andes*, Bogotá, Colombia.
- 2019 **Bachelor's Degree in Economics**, *Universidad del Rosario*, Bogotá, Colombia.

Work Experience

- July 2022 - present **Research assistant at DIME**, *World Bank*, Washington DC, USA.
Currently supporting impact evaluations in Nigeria, Côte d'Ivoire, Benin, Uganda, and Nicaragua. I support multiple stages of RCTs. Main responsibilities include:
 - **In data collection:** Coordination with field coordinators through programming of survey instruments (ODK) and producing data quality checks mostly in Stata. Also, liaise with survey firms, government, and nongovernment partners in all data collection stages of RCTs.
 - **In data management before analysis (anonymization, data cleaning, variable creation):** I follow rigorous DIME standards to ensure reproducibility of the entire process. This entails structured Github data management of projects, data flow charts, and a clear organization of questionnaires matched to data and code. Finally I am in charge of all data cleaning processes with primary (in-field) and secondary data sources, according to the [DIME Analytics book guide](#) for RAs.
 - **In data analysis:** I support all analysis stages; from power calculations (using automated code) and baseline reports to econometric analysis for academic papers, supporting [Patrick Premand](#)'s R&R reviews for top journals (he is my direct boss at the WB). I also prepare the reproducibility packages for academic publications. I also support other analyses needed in the monitoring of RCT implementation, involving technical conversations with principal investigators, fellow RAs, senior research analysis, etc.
 - Finally, in this job I also support other tasks needed in the support of PIs, like pre-analysis plans, project registration for IRBs, support for technical missions in Africa, and management with stakeholders in the non-academic sector (e.g. survey firms), developing soft skills essential for work for economic development projects.
- July 2022 - September 2022 **Part-time (10 hours a week) freelance research assistant to professor Alisha Holland**, *Harvard University - Department of Government*, remotely from Bogotá, Colombia.
Supported research in a political economy project that intends to understand how institutional oversight affects infrastructure quality and spending at the municipality level in Colombia. I assisted with data collection programming.

Sept 2021 - **Research assistant to professor [Diego Ramos-Toro](#)**, *Dartmouth College - Department of Economics*, remotely from Bogotá, Colombia.

Supported research in development economics, political economy, behavioral economics, and economic history. In charge of the management and organization of databases from multiple sources, and implementation of statistical and econometric analysis in Stata and R. Supported the following projects:

1) [Social Exclusion and Social Preferences: Evidence from Colombia's Leper Colony](#). Used machine learning techniques for text and sentiment analysis. Also supported econometric analysis through data collected in three surveys.

2) An ongoing research project that studies the effect of mandatory military service on civil values and behavior in Latin America. Supported data collection and cleaning, and econometric analysis.

3) An ongoing research project named [Gauging Preference for Democracy in Absence of Free Speech](#). Supported by performing descriptive and econometric analysis.

Oct 2020 - **Research assistant to professor [Nancy Palacios](#)**, *Universidad de los Andes - Department of Education*, Bogotá, Colombia.

I was in charge of statistical analysis and econometric modeling of projects focused on education. I modeled microdata (in Stata and R) and used machine learning applications to analyze structured and non-structured data of education and racism. I was also involved in projects that studied the effect of the Covid-19 pandemic on the Colombian education system, studying heterogeneous effects and the inequality produced by the shock on national standardized tests. Additionally, I had the opportunity to analyze students' behavior and preferences through surveys implemented in public schools based in Bogotá.

Sept 2018 - Jul 2020 **Freelance consultant to the Migration Unit**, *Inter-American Development Bank (IDB)*, Bogotá, Colombia.

Provided assistance to economist Jeremy Harris in the development of databases on issues of international trade and international migration in Latin America and the Caribbean (LAC), this in order to extract information about how migration and trade are organized in the region. These data were used as inputs for researchers to extract relevant information with regard to economic development in the region.

Jun - Aug 2018 **Intern at the Integration and Trade Sector**, *Inter-American Development Bank (IDB)*, Washington DC, USA.

One of the 39 selected candidates among 3,085 applicants from 48 countries. Only Colombian undergraduate selected for the 2018-summer cohort.

- Research assistant to the principal economist and research coordinator ([Mauricio Mesquita Moreira](#)) of the sector, gathering and analyzing data, performing statistical and econometric analysis in Stata. I also assisted Mauricio in research meetings and reports, studying issues on economic development, trade, integration and globalization in LAC.
- I also performed an economic study of the subscribers' trade preferences (microeconomic data of 45,000 consumers) of the Integration and Trade Sector products (mooc courses, special courses for governments, etc), using data analysis tools in Excel, Stata and R. The final project was presented to Antoni Esteveadeordal.

- Jan-June 2018 **Intern at the Office of Economic Studies**, *Ministry of Trade, Industry and Tourism*, Bogotá, Colombia, .
Note: I had to withdraw this contract at the end of June 2018 due to an offer to work at the IDB. This explains why the subject "Internship" appears as failed in my undergraduate transcripts.
- Supported the research team by building databases and performing statistical and econometric analysis with Stata, R and Excel.
 - Carried out economic research with regard to the Colombian industry, trade and tourism sectors.
 - Made reports on the Colombian economy with regard to its industry, agriculture, trade and external sector.
 - Reviewed economic literature on industry, trade and tourism for research purposes.
- 2016 **Teaching assistant: Statistics for Economists (Professor Flor Alba Ruiz Arias)**, *Universidad del Rosario*, Bogotá, Colombia.
- Taught 2 hours per week, making a review of topics given by the lecturer, showing difficult exercises on the whiteboard and grading quizzes.
 - Explained and demonstrated the contribution of the subject to the economic and econometric theory. I also showed students examples of statistical analysis with actual data in Stata.

Volunteer Experience

- 2025 **Mentor to undergraduate students in Economics**, *Universidad del Rosario*, Remotely from Washington DC.
 I participate in an alumni mentorship program where I guide and support undergraduate students on their career paths as future economists.
- 2017 **Storyteller**, *Hyde Park Barracks Museum*, Sydney, Australia.
 Informed visitors about the museum's history and explained them the critical value of each lounge in the Australian history.
- 2015 **Facer/Volunteer**, *SOS Children's Villages International*, Bogotá, Colombia.
 Organized and participated in events for recreation between donors and children who belong to the organization with the aim to deepen and broaden relationships throughout the aid program.
- 2014 **Assistant**, *AIESEC at Universidad del Rosario*, Bogotá, Colombia.
 Area of Outgoing Social Exchanges. Provided companionship and guided students from Universidad del Rosario in their exchange process when traveling to other countries with all the information they needed.

Languages

- Spanish: native
- English: fluent
- French: intermediate

Computer Skills

- | | |
|----------------------|---|
| Microsoft Office | Word, Excel, Powerpoint, Access |
| Statistical Packages | Stata (advanced), R (intermediate), Python (basic), and E-views (intermediate). |
| Others | Open Data Kit (intermediate) L ^A T _E X(intermediate), Tableau (basic), and QGIS (basic) |

Working Papers

- [Public Wi-Fi zones and their effect on students' cognitive performance: Evidence for schools in Colombian rural areas](#) (Master's Degree thesis. Supervisor: [Rachid Laajaj](#))
- [International Business Travel and Trade: A Case Analysis for Colombia](#) (Undergraduate thesis. Supervisor: [Jose David Pulido Pescador](#))

Research Assistantships to Journal Publications

- [Social Exclusion and Social Preferences: Evidence from Colombia's Leper Colony](#)
- [Direct and Indirect Effects of Subsidized Dual Apprenticeships](#)
- [Community monitoring and social accountability in development projects: Experimental evidence from Uganda](#)

Research Assistantships to Working Papers

- [Savings Facilitation or Capital Injection? Impacts and Spillovers of Livelihood Interventions in Post-Conflict Côte d'Ivoire](#)
- [Gauging Preference for Democracy in Absence of Free Speech](#)
- [Texting Parents about Early Child Development: Behavioral Changes and Unintended Social Effects](#)

Research Assistantships to Other Publications (books and policy briefs)

- [Baseline report for an ongoing apprenticeship RCT program in Nigeria](#)
- [Trading Promises for Results. What Global Integration Can Do for Latin America and the Caribbean \(IDB's flagship publication in 2019\)](#) (In my internship I provided research assistance to Mauricio Mesquita Moreira when the book was in the planning stage.)
- [El desarrollo del pensamiento histórico en las escuelas de primaria y secundaria. Una tarea necesaria para la educación en Colombia.](#) (publication only available in Spanish)
- [Revista 2 de Estudios Económicos del Ministerio de Comercio, Industria y Turismo, Colombia, 2018](#) (publication only available in Spanish)

Other Courses

- 2024 **Real Analysis and Optimization for Economists (grade: 4.83/5)**, *Universidad de los Andes*, Bogotá, Colombia.
- 2023 **Reproducible Research Fundamentals**, *DIME-World Bank*, Washington D.C., USA.
- 2022 **Protecting Human Research Participants Online Training Certificate**.
- 2022 **Artificial Intelligence in the Social Sciences**, *Bogotá Summer School of Economics*, Bogotá, Colombia.
- 2021 **Introduction to data science**, *Bogotá Summer School of Economics*, Bogotá, Colombia.
- 2019 - 2025 **French Language Courses**, *Alliance Française*, Bogotá, Colombia.
- Jun 2018 **Big Data Workshop**, *UR Summer School*, Bogotá, Colombia.
- Jan-Jul 2017 **Advanced English Intensive Course for Academic Purposes**, *International House*, Sydney, Australia.
